

IBiS

INTERDEPARTMENTAL **B**IOLICAL **S**CIENCES PROGRAM

ANNOUNCEMENT

IBiS DISTINGUISHED ROLE MODEL IN LIFE SCIENCES

LECTURE SERIES

The IBiS program is establishing a Distinguished Role Model in Life Sciences Lecture Series in order to offer its students greater diversity of role models. Speakers will be selected for their outstanding science and mentoring by a committee of IBiS students and faculty members. The lecturers will serve as role models for female and minority students as these demographic groups are underrepresented among Northwestern University's current science faculty. In addition to the lecture, the visit will include roundtable discussions organized by students on relevant subjects.

The IBiS Distinguished Role Model in Life Sciences Lecture Series will invite three speakers a year beginning in fall 2008.
